

Station : 29102
Location : Beach Blvd, Hamilton
Reporting Period : 01 January to 31 March 2022

Sample Matrix : SUMMA Canisters
Method : GC/MS (TO15A)
Valid Samples - No. / % : 8 / 100%

Table with columns for VOC Parameter, AAQC 24 Hr, URT 24 Hr, RDL, and 16 sampling dates from 05-Jan-22 to 22-Jun-22. Rows include various VOCs like 2,2,4-Trimethylpentane, Carbon Disulfide, Propene, etc.

Note 1: All non detectable results are reported as 1/2 the detection limit.
Note 2: Due to ambient air quality sampling methodology and laboratory analytics a Reportable Detection Limit (RDL) can fluctuate from sample to sample. Therefore the reported 1/2 RDL values, for example the reported value may be above or below RDL indicated in the RDL column. Note all data presented is actual data as reported from the laboratory and modified to meet the MECP 1/2 detection limit reporting requirement.

Note 1: All non detectable results are reported as ½ the detection limit.

Note 2: Due to ambient air quality sampling methodology and laboratory analytics a Reportable Detection Limit (RDL) can fluctuate from sample to sample. Therefore the reported ½ RDL values, for example the reported value may be above or below RDL indicated in the RDL column. Note all data presented is actual data as reported from the laboratory and modified to meet the MECP ½ detection limit reporting requirement.
