

HAMN - VOC Report

Station : 29180
Location : Burlington St / Gage Ave, Hamilton
Reporting Period : 01 January, 2018 to 31 December, 2018

Sample Matrix : SUMMA Canisters
Method : GC/MS (TO15A)
Valid Samples - No. / % : 29 / 93.5 %

Table with columns for VOC Parameter, AAQC 24 Hr, URT 24 Hr, RDL, and sampling dates from 02-Jan-18 to 19-Jun-18, followed by Average, Maximum, Minimum values and Samples > AAQC and > URT counts.

Note 1: All non detectable results are reported as 1/2 the detection limit.
Note 2: Due to ambient air quality sampling methodology and laboratory analytics a Reportable Detection Limit (RDL) can fluctuate from sample to sample. Therefore the reported 1/2 RDL values, for example the reported value may be above or below RDL indicated in the RDL column. Note all data presented is actual data as reported from the laboratory and modified to meet the MECP 1/2 detection limit reporting requirement.
